TEGAN BIPAL
FÁBRICA DE NUTRICIÓN ANIMAL

The best technique for
Pigeons

ALL THE NEEDS OF YOUR PIGEONS COVERED WITH A SINGLE PRODUCT

Biological, vitamin and
mineral supplement
necessary to balance the
food of pigeons in
captivity.

BIPAL TOTAL is a natural,
biological, vitamin, mineral
product with amino acids
necessary for the health
of your pigeons.

Wild pigeons take from
nature all the substances
necessary for their life. However,
for pigeons in captivity it is
essential to provide them these
elements in a balanced complex such
as BIPAL FORTE so they have the
correct nourishment.

BIPAL FORTE is a biological, vitamin and
mineral product, therefore besides providing
vitamins and minerals like other products on
the market, it has a strong and effective
regulator of the digestive system that increases
the defences of the body and which is completely
necessary for your pigeons in captivity.

With **BIPAL FORTE** you will:

F O R T E

Improve resistance in competitions

Terminate the deficiency-related diseases that the majority of birds in captivity currently suffer and that the breeder does not detect.

Rapid moulting, with the new feathers coming in long, strong, dense and with vigour.

The chicks hatch and grow strong and vigorous.

Approximately 20% more chicks.

Eliminate the digestive disorders, therefore, the food diarrhoeas (soft excrements).

Greater resistance to disease since it strengthens the body's defences.

Save considerably on medicines.

Improve the fertility of the parents.

The pigeons stop eating their own excrements (beginning of a large part of the infections).

Ingredients:

Fermentation Soluble, Butylhydroxytoluene BTH - E321, Vitamin A, D3, E (50%), K3, B1, B2 B12 Nicotinic Acid Lime Pantothenate, Choline Chloride (50%), Manganese Sulfate Monohydrate, Copper Sulfate, Oxide Zinc, Potassium Iodide, Sodium Selenite, Cobalt Sulfate, Colloidal Silicon, Calcium Carbonate, Dicalcium Phosphate, Sodium Chloride, Methionine and Lysine.

USE: For pigeons.

INSTRUCTIONS FOR USE: Freely available throughout the year.

PRESENTATION: Bucket of 4 kilos and jar of 1 kg.

CONSERVATION: In a dry, cool place and protected from light.
